Subject: Reject changes to Proposed Portland Harbor Superfund Site Cleanup Plan

Dear EPA at Portland Harbor Superfund Site,

I live in a neighborhood impacted by the pollution named to be remedied in the Superfund Portland Harbor cleanup. 18 years ago when I moved to the St. Johns neighborhood in Portland I attended a neighborhood association meeting where I learned of the toxic water and ground in my neighborhood. Since that time I have read the warnings not to consume fish from the river. However, despite these warning, people fish the Willamette River continually. We must make the river and the ground beneath the river safe for future generation. I will not set foot in the river until that time as I am concerned about toxic contamination. Please do what is right and fully fund the Portland Harbor clean up.

Your plan to reduce cleanup based on a new review of the cancer risk of benzo(a)pyrene does not measure up to the standard that we deserve to protect the river and its users. These findings do not change the fact that benzo(a)pyrene exists in our river and is a known carcinogen, nor does it take into account the threat it poses to other aspects of heart, respiratory, and reproductive health.

What your plan does is limit important cleanup efforts based on a scheduled toxicity review of a chemical that was already flagged as dangerous and in need of cleaning. This change would only benefit polluters who are responsible for that cleanup cost in the first place, showing a priority for industry profits over public need. The proposed plan also does not account for the chemical's other dangers, especially when interacting with the many contaminants within the Portland Harbor, including other PAHs, PCBs, dioxins, and more.

The community surrounding the Portland Harbor have dedicated time, effort, and resources for a cleanup plan that will restore the river to safe levels. It should not be expected to compromise its health and the health of the river, not for \$35 million and 17 acres of reduced effort. Maintain the plan outlined in the 2017 Record of Decision and abide by the timeline for revisions that are established in the Superfund cleanup process.

Thank you.

Sincerely,

(b) (6)
